About Centuera:

Centuera is your partner in professional development, offering expert-led Lean Six Sigma training designed to enhance your operational excellence and quality management skills. Our comprehensive curriculum, delivered by experienced instructors, covers key methodologies like DMAIC and equips you with the tools to drive process improvement and organizational success.

Program Overview:

Designed to align with the leading Green Belt standard set by the globally recognized accreditation body, IASSC, this Lean Six Sigma Green Belt Certification Course offers a complete introduction to Six Sigma and DMAIC methodology, how to measure company performance, identify issues and offer solutions using real-world examples.

The Lean Six Sigma Green Belt Certification Training Course is designed to equip participants with the knowledge, skills, and tools to lead process improvement initiatives and drive organizational success. Combining the principles of Lean management and Six Sigma methodology, this program provides a comprehensive understanding of identifying and eliminating waste, reducing variation, and improving process efficiency and quality.

Program Features:

Exclusive GenAI Modules for Quality Management

36 hrs of Live Instructor-led Training | Earn 35 PDUs

4 Simulations Assessments | 4 Live Projects

IASSC Exam Voucher Included | Lifetime LMS Access

Accredited to Globally Recognized IASSC

Benefits

The Six Sigma Green Belt certification enhances professionals' problem-solving and data analysis skills through the DMAIC methodology and statistical tools, improving process efficiency and customer satisfaction. It provides a competitive edge by being globally recognized, making certified individuals valuable assets to organizations. Additionally, it fosters career advancement opportunities by prioritizing problem-solving and analytical capabilities, ultimately contributing to organizational success and personal development.

Demand for Lean Six Sigma Professionals:

The demand for Lean Six Sigma professionals is driven by the need for organizations to achieve operational excellence, reduce costs, improve quality, remain competitive, comply with regulations, adapt to digital transformation, and foster a culture of continuous improvement. As industries evolve and embrace Lean Six Sigma methodologies, professionals with expertise in this field will continue to be in high demand globally.

Demand across various sectors

- Manufacturing Pharma
- Healthcare
- & Life Sciences
- Financial Services

Delivery Mode

- ✓ Live instructor-led sessions + online self-learning material

Prerequisites

- ✓ There are no prerequisites to sit for the IASSC Certified Lean Six Sigma Green Belt exam.

Target Audience

- ✓ Project managers
- ✓ Manufacturing engineers
- ✓ Consultants
- ✓ Quality Managers
- ✓ Operations Managers
- ✓ Business analyst
- ✓ Team Leaders across domains
- ✓ Functional managers across domains

Key Learning Outcomes

At the end of this course, you will be able to:

- ✓ Become a key stakeholder in leading and implementing Lean Six Sigma projects in your organization
- ✓ Describe how to identify an improvement project in the Define phase
- ✓ Explain how to measure process and product in the Measure phase
- ✓ Perform data analysis and hypothesis testing in the Analyze phase
- ✓ Identify possible improvement actions for the performance of variations in the Improve phase Define efficient operating levels for inputs and outputs in the Control phase
- ✓ Use DFSS Tools such as Quality Function Deployment (QFD), Failure Mode and Effects Analysis (FMEA), and Risk Priority Number (RPN)

Course Curriculum:

1

Session 1 - Six Sigma and Organizational Goals

Lesson 1.0 - Introduction to Six Sigma and Organizational Goals

Lesson 1.1 - Six Sigma and Organizational Goals

Lesson 1.2 - Lean Principles in the Organization

Lesson 1.3 - Design for Six Sigma (DFSS) Methodologies

Lesson 1.4 - Summary to Six Sigma and the Organization

2

Session 2 - Define Phase

Lesson 2.0 - Introduction to Define Phase

Lesson 2.1 - Project Identification

Lesson 2.2 - Voice of the Customer (VOC)

Lesson 2.3 - Project Management Basics

Lesson 2.4 - Management and Planning Tools (Apply)

Lesson 2.5 - Business Results for Projects

Lesson 2.6 - Team Dynamics and Performance

Lesson 2.7 - Summary of Define Phase

Lesson 2.8 - Project 1

3

Session 3 - Measure Phase

Lesson 3.0 - Introduction to Measure Phase

Lesson 3.1 - Process Analysis and Documentation (Create)

Lesson 3.2 - Probability and Statistics

Lesson 3.3 - Collecting and Summarizing Data

Lesson 3.4 - Statistical Distributions (Understand)

Lesson 3.5 - Measurement System Analysis (MSA)(Evaluate)

Lesson 3.6 - Process and Performance Capability

Lesson 3.7 - Summary of Measure Phase

Lesson 3.8 - Project

4

Session 4 - Analyze Phase

Lesson 4.0 - Introduction to Analyze Phase

Lesson 4.1 - Hypothesis Testing

Lesson 4.2 - Exploratory Data Analysis

Lesson 4.3 - Summary of Analyze Phase

Lesson 4.4 - Project

5

Session 5 - Improve Phase

Lesson 5.0 - Introduction to Improve Phase

Lesson 5.1 - Design of Experiments (DOE)

Lesson 5.2 - Root Cause Analysis (Analyze)

Lesson 5.3 - Lean Tools

Lesson 5.4 - Selecting a Solution

Lesson 5.5 - Summary Improve Phase

Lesson 5.6 - Project

6

Session 6 - Control Phase

Lesson 6.0 - Introduction to Control Phaset

Lesson 6.1 - Statistical Process Control (SPC)

Lesson 6.2 - Control Plan (Apply)

Lesson 6.3 - Lean Tools for Process Control

Lesson 6.4 - Summary of Control Phase

Lesson 6.5 - Project
